HEALTH CORNER

Healthy Habits to Help Prevent Flu

1. The single best way to prevent seasonal flu is to get vaccinated each year.
2. Avoid close contact with people who are sick.
3. When you are sick, keep your distance from others to protect them from getting sick too. Stay home for at least 24 hours after your fever is gone except to get medical care or other necessities. Your fever should be gone without the need to use a fever-reducing medicine.
4. Stay home when you are sick.
5. Cover your mouth and nose when coughing or sneezing.
6. Clean your hands and avoid touching your eyes, nose or mouth.
7. Clean and disinfect frequently touched surfaces at home, work or school, especially if someone is ill.
